

3.1 CAT 403 – Computing Infrastructure: Rubric - Final Report (10%)

Criteria	Weight	Excellent A/A-	Good B+/B/B-	Fair C+/C/C-	Poor Minimal or No Control D+/D/D-/F
PLO3 - Select programming /research methods to evaluate system algorithm or protocols. (CLO2)					
Contents	40%	1. Excellent in describing the problem statement and motivation with proper references. 2. Excellent elaboration of system objectives and scope 3. Very good stated similar or existing system/ solution and existing method/ technique/ algorithm 4. Excellent in showing the planning (e.g., Gantt Chart). 5. Excellent in defining systems users 6. Excellent in formulating limitation and future works 7. Excellently written the report that fulfils the grammar rules and can deliver the correct meaning. 8. Excellently follow the report format. The tables and figures have the proper captions 9. Excellently written citations and references with a proper format.	1. Fairly describe the problem statement and motivation with references. 2. Fairly elaborate the system objectives and scope 3. Fairly state similar or existing system/ solution and existing method/ technique/ algorithm 4. Fairly show the planning (e.g., Gantt Chart). 5. Fairly define system users 6. Fairly formulate limitation and future works 7. Moderately written the report that fulfils the grammar rules and can deliver the correct meaning. 8. Follow the report format. The tables and figures have the proper captions. 9. Adequately written citations and references	1. Weak in describing the problem statement and motivation. 2. Weak in elaboration of the system objectives and scope 3. Not clear stated similar or existing system/solution and existing method/technique/algorithm 4. Weak in showing the planning (e.g., Gantt Chart). 5. Weak in defining system users 6. Weak in formulating limitation and future works 7. Fairly written the report that fulfils the grammar rules and can deliver the correct meaning that impairs the flow of communication. 8. Format of report can be improved. Tables and figures can be improved. 9. Citations and references are given occasionally.	1. Poor in expressing a problem statement and motivation. 2. Poor in elaborating the system objectives and scope 3. Poor in stating similar or existing system/solution and existing method/ technique/ algorithm 4. Not showing the planning (e.g., Gantt Chart). 5. Poor in defining system 6. No limitation and future works 7. Poorly written the report and not fulfil the grammar rules and is unable to deliver the correct meaning that impairs the flow of communication. 8. Not follow the report format. Tables, figures, and references are incomplete and incorrect. 9. Citations and references poorly written
Description of System Implementation	20%	1. Excellent description of a solution using CI method(s). 2. Excellent in demonstrating the overall modules & system architecture 3. Excellent specifying and describing the methods/ approaches used with justification of the proposed solution. (use case, sequence, DFD etc) 4. Excellent in describing the implementation of the method/approach in the system.	1. Fairly describe of a solution using CI method(s). 2. Fairly demonstrate the overall modules & system architecture 3. Fairly specify and describe the methods/ approaches used with justification of the proposed solution. (use case, sequence, DFD etc) 4. Fairly describe the implementation of the method/ approach in the system. 5. Fairly execute the testing plan	1. Weakly describe of a solution using CI method(s). 2. Weakly demonstrate the overall modules & system architecture 3. Weakly specify and describe the methods/ approaches used with justification of the proposed solution. (use case, sequence, DFD etc) 4. Weakly describe the implementation of the method/ approach in the system. 5. Weakly execute the testing plan	1. Poorly describe of a solution using CI method(s). 2. Poorly demonstrate the overall modules & system architecture 3. Poorly specify and describe the methods/ approaches used with justification of the proposed solution. (use case, sequence, DFD etc) 4. Poorly describe the implementation of the method/ approach in the system.

		5. Excellent in executing the testing plan and evaluation 6. Excellent in executing the performance evaluation (if applicable) 7. Excellent in defining deployment plan (if applicable)	and evaluation 6. Fairly execute the performance evaluation (if applicable) 7. Fairly define the deployment plan (if applicable)	and evaluation 6. Weakly execute the performance evaluation (if applicable) 7. Weakly define the deployment plan (if applicable)	5. Poorly execute the testing plan and evaluation 6. Poorly execute the performance evaluation (if applicable) 7. Poorly define the deployment plan (if applicable)
PLO7 - Relate existing literatures with new ideas in conducting the project (CLO5)					
Organisation Skill	20%	1. The report is excellently organized and contains all the required related background study, existing solutions, and the proposed solution. 2. The report is excellently arranged in the logical order from the introduction until references section.	1. The report is fairly organized and contains the required related background study, existing solutions, and the proposed solution. 2. The report is fairly arranged in the logical order from the introduction until references section.	1. The report is weakly organized and contains partial required related background study, existing solutions, and the proposed solution. 2. The report is weakly arranged in some logical order from the introduction until references section.	1. The report is poorly organized and contains incomplete required related background study, existing solutions, and the proposed solution. 2. The report is poorly arranged in some order from the introduction until references section.
Ability to relate to the SDG Alignment	20%	The problem addressed to be solvedexcellently meet any of the SDG	The problem addressed to be solvedmeets the SDG	The problem addressed to be solvedoccasionally meet the SDG	The problem addressed to be solveddoes not meet the SDG
